### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 1-13, 40-47, and 51-57, drawn to a system for access to multiple data sources and aggregating data from data sources into a unified user profile, classified in class 707, subclass 101.

Group II: Claim 24-39 and 63-67, drawn to a system for providing transparent access to databases in which implicit and explicit properties can be retrieved and updated, classified in class 707, subclass 204.

Group III: Claims 14-23 and 58-61, drawn to a system for generating a unified user profile for providing transparent read and write access to the existing user data, classified in class 707, subclass 10.

Group IV: claims 48-50 drawn to a system for generating database or data structure by using identifier pairs corresponding to a data entry that does not follow a name convention by using identifier pairs corresponding to a data entry that does not follow a name convention, classified in class 707, subclass 102.

The inventions are distinct, each from the other because of the following reasons:

Inventions Groups I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each invention Group has separate utility such as a system for access to multiple data sources and aggregating data from data sources into a unified user profile as specified in Group I, a system for providing transparent access to

Art Unit: 2165

databases in which implicit and explicit properties can be retrieved and updated as specified in Group II, a system for generating a unified user profile for providing transparent read and write access to the existing user data as specified in Group III, and a system for generating database or data structure by using identifier pairs corresponding to a data entry that does not follow a name convention as specified in Group IV. See M.P.E.P. § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III, or IV; therefore, restriction for examination purposes as indicated is proper.
